The 3 categories of intrinsic, instrumental, and relational values

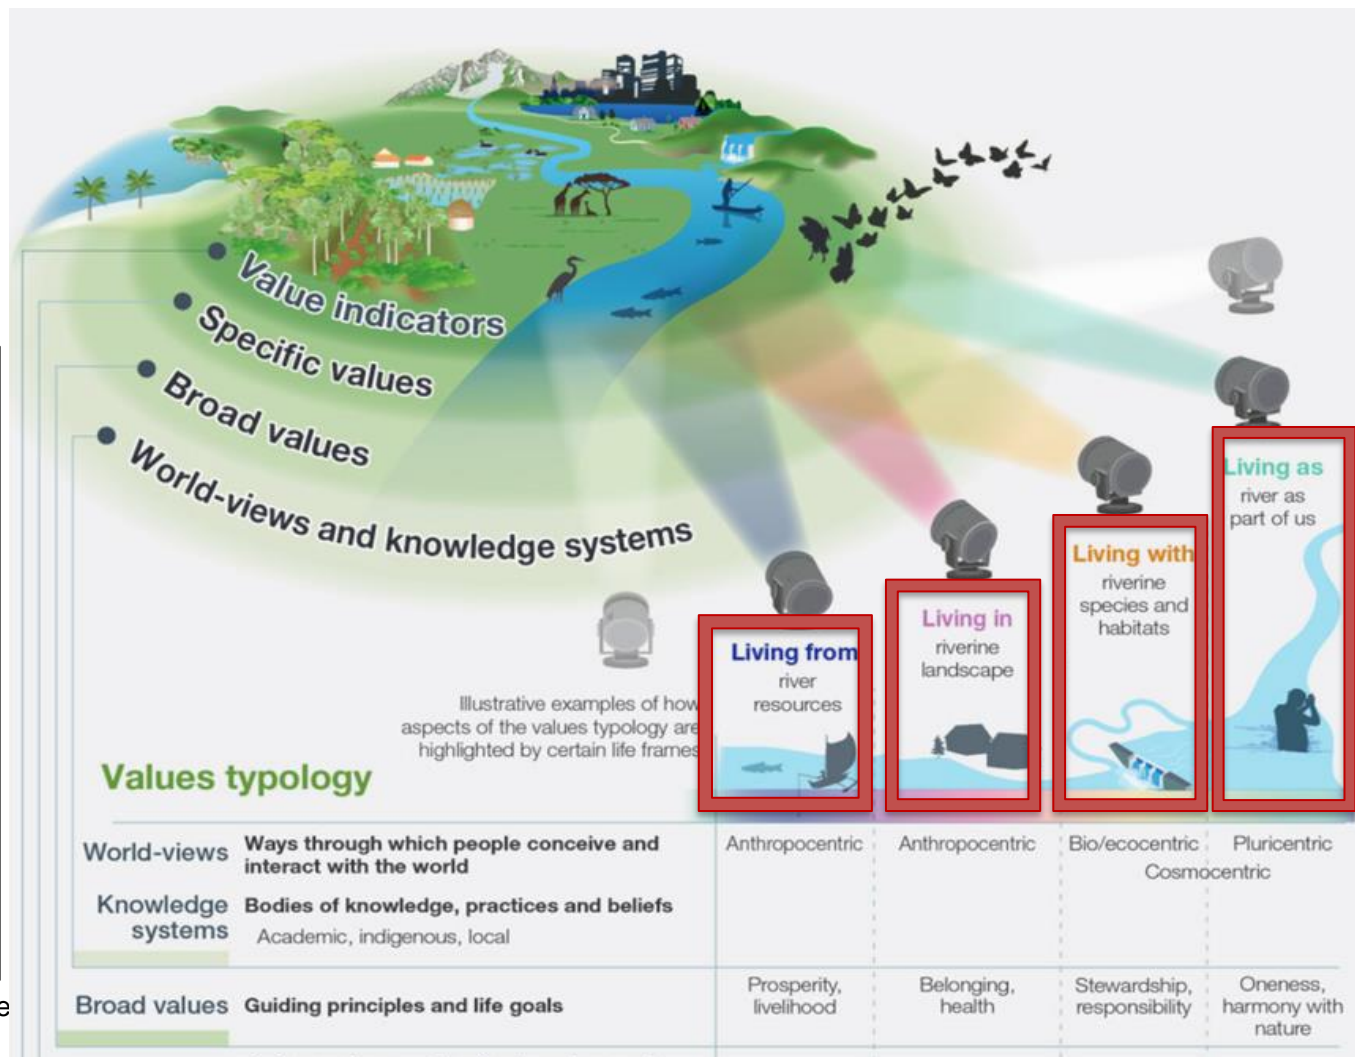

Austin Himes et al. (2024) Why nature matters: A systematic review of intrinsic, instrumental, and relational values. *BioScience*, Volume 74, Issue 1, January 2024, Pages 25–43, <https://doi.org/10.1093/biosci/biad109>

«Living in harmony with nature»: from, in, with, as nature: 4 “life frames”

<https://zenodo.org/record/7410287/file>

Living from nature: The ability of nature to provide resources to support people's livelihoods, needs, and desires.

Reference values: prosperity, livelihood

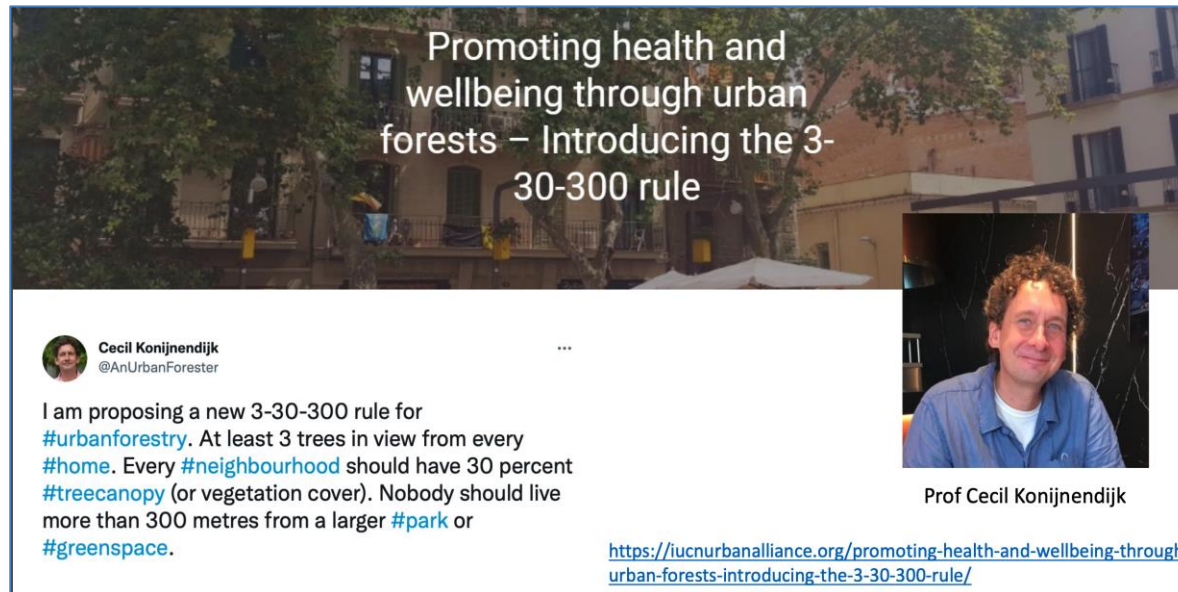

Traditional forest products (wood, NWFP, water, ...)

... but also, Nature-Based Solutions

Living in nature: the importance of nature as an environment for people's sense of place and identity.

Reference values: stewardship, responsibility

Promoting health and wellbeing through urban forests – Introducing the 3-30-300 rule

Cecil Konijnendijk
@AnUrbanForester

I am proposing a new 3-30-300 rule for [#urbanforestry](#). At least 3 trees in view from every [#home](#). Every [#neighbourhood](#) should have 30 percent [#treecanopy](#) (or vegetation cover). Nobody should live more than 300 metres from a larger [#park](#) or [#greenspace](#).

<https://iucnurbanalliance.org/promoting-health-and-wellbeing-through-urban-forests-introducing-the-3-30-300-rule/>

Prof Cecil Konijnendijk

Living with nature: the inherent right of every species to thrive regardless of human needs.

Reference values: protection, belonging,
“One Health”

Fonte: C.Konijnendijk, D.Devkota, S.Mansourian, C.Wildburger (eds), 2023. Forests and Trees for Human Health: Pathways, Impacts, Challenges and Response Options. A Global Assessment Report. IUFRO, CFP.

Recognising the rights of nature

Living as nature: the natural world as a physical, mental, and spiritual part of oneself.

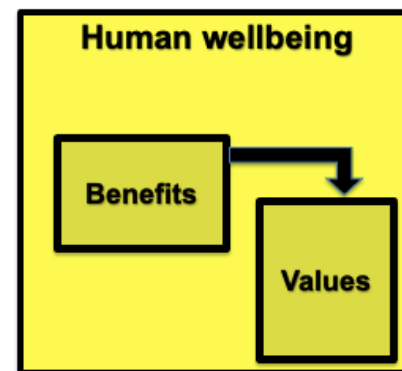

Reference values: oneness, harmony,
“One Earth”

The Millenium Ecosystem Assessment (MEA) classification: the benefis

Source: Millennium Ecosystem Assessment

CONSTITUENTS OF WELL-BEING

Security

- PERSONAL SAFETY
- SECURE RESOURCE ACCESS
- SECURITY FROM DISASTERS

Basic material for good life

- ADEQUATE LIVELIHOODS
- SUFFICIENT NUTRITIOUS FOOD
- SHELTER
- ACCESS TO GOODS

Health

- STRENGTH
- FEELING WELL
- ACCESS TO CLEAN AIR AND WATER

Good social relations

- SOCIAL COHESION
- MUTUAL RESPECT
- ABILITY TO HELP OTHERS

Freedom of choice and action

OPPORTUNITY TO BE ABLE TO ACHIEVE WHAT AN INDIVIDUAL VALUES DOING AND BEING

Source: Millennium Ecosystem Assessment

ARROW'S COLOR
Potential for mediation by socioeconomic factors

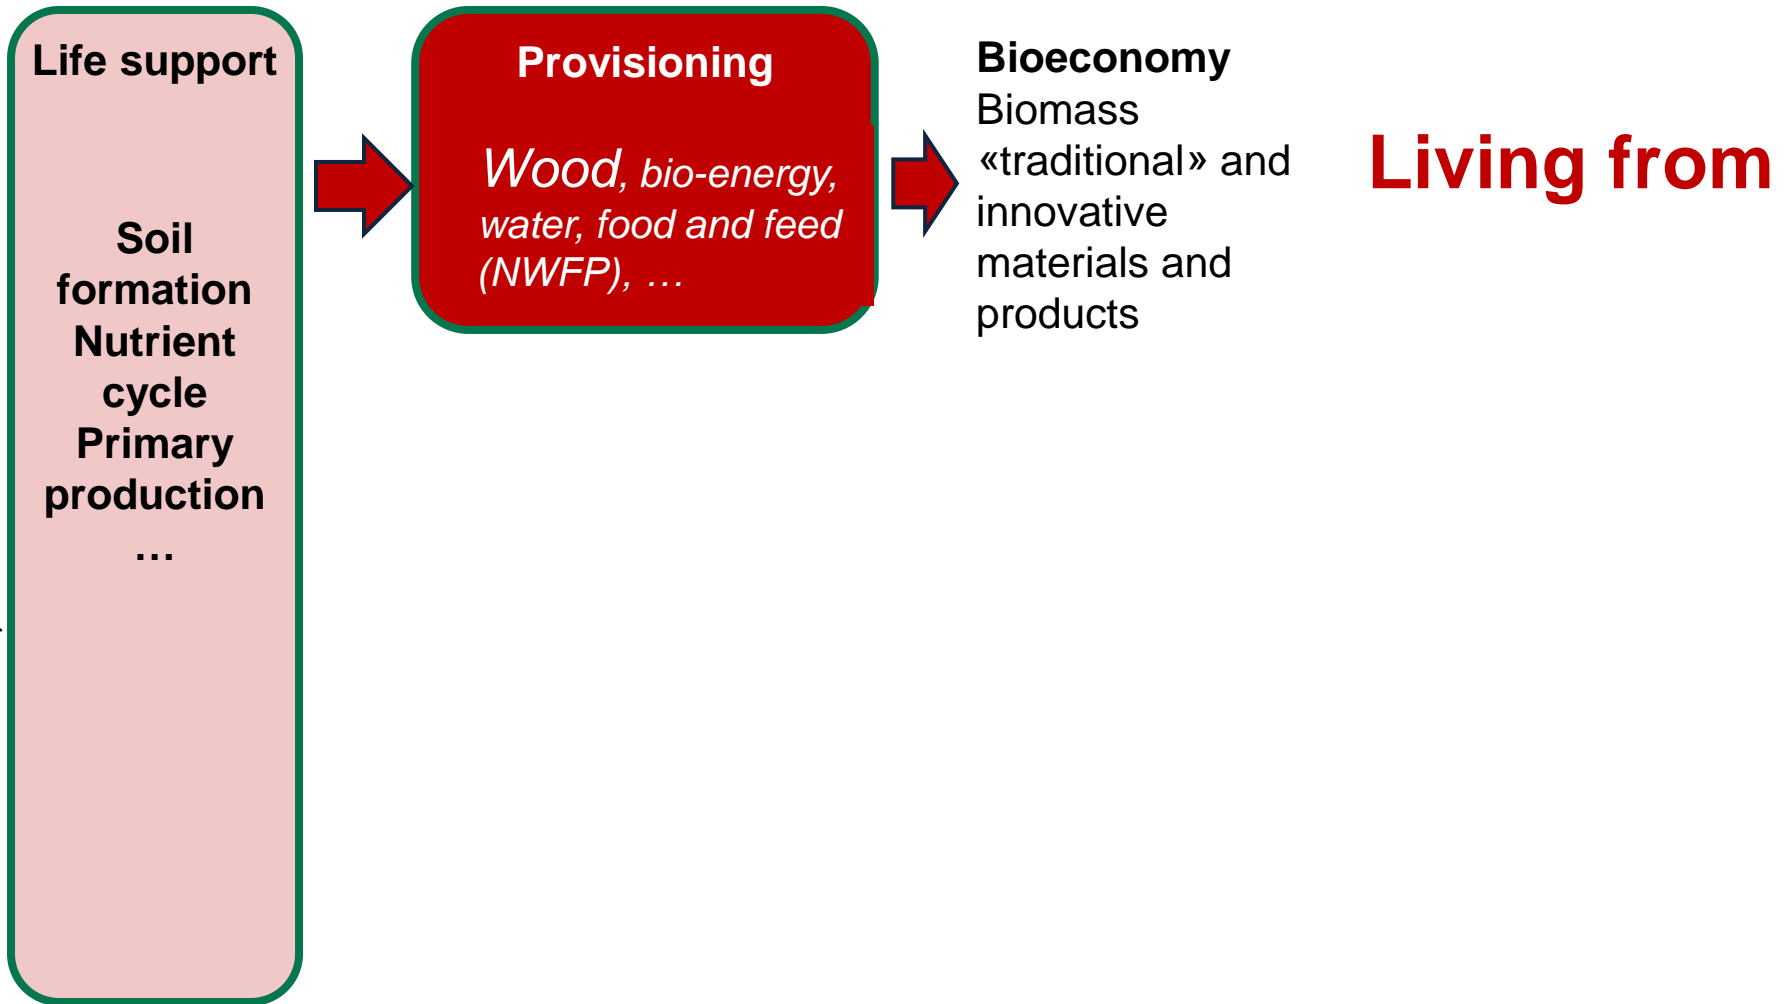

- Low
- Medium
- High

ARROW'S WIDTH
Intensity of linkages between ecosystem services and human well-being

- Weak
- Medium
- Strong

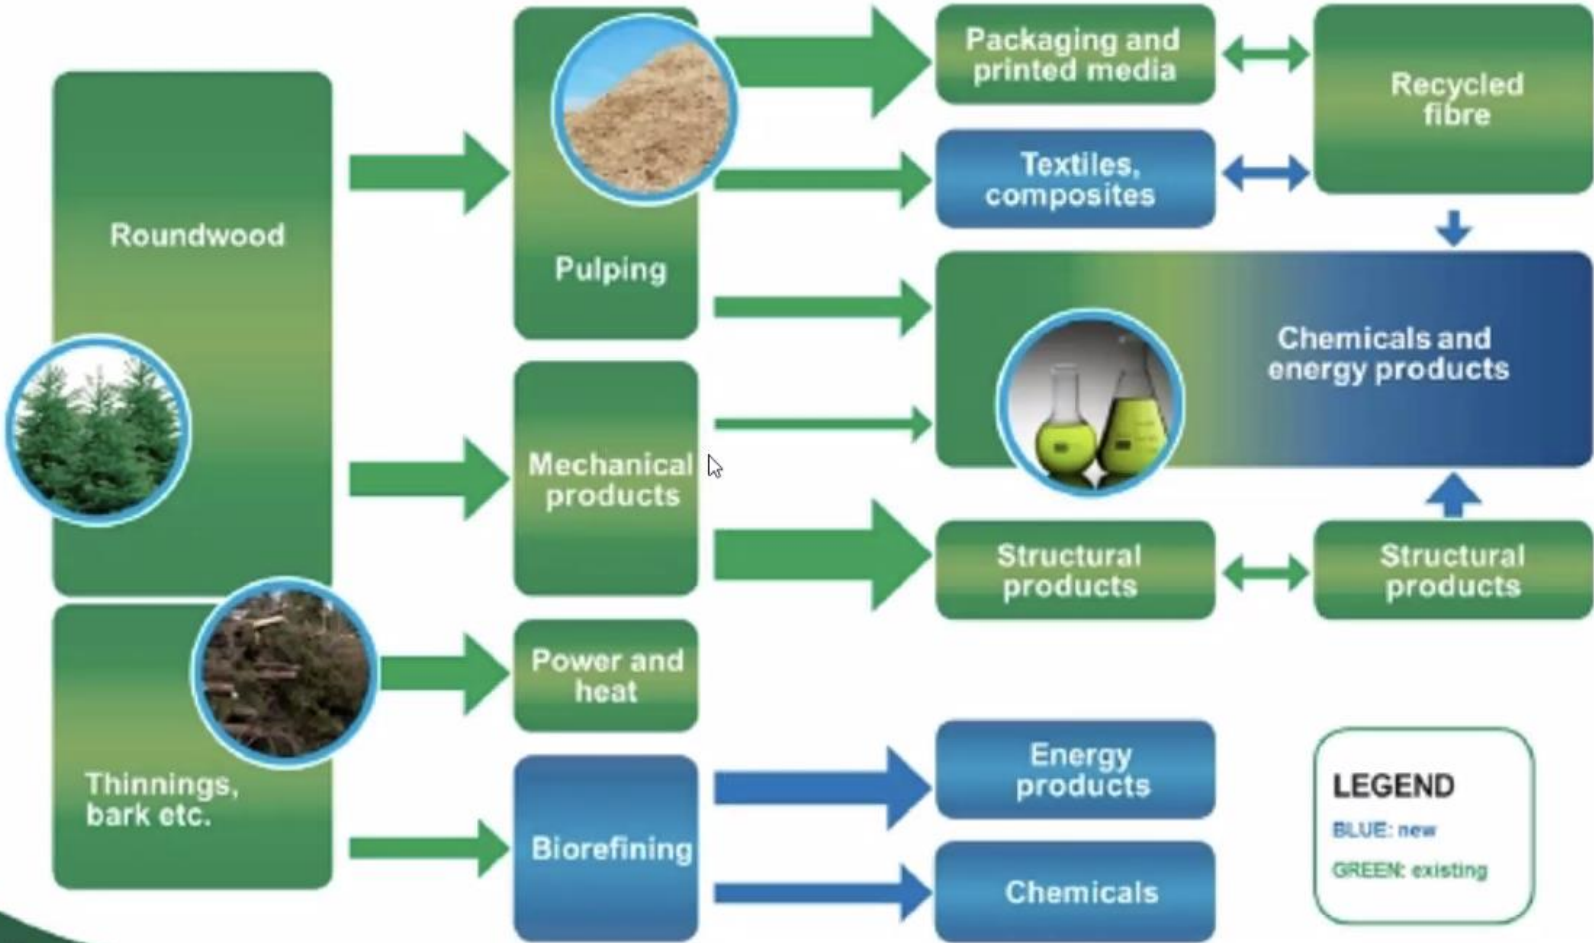

The Millenium Ecosystem Assessment (MEA) classification of Ecosystem Services

Ecosystem Services in the forestry sector

Old and new wood value chains

5 new products for the bioeconomy

(excluding the energy use of biomass)

Food and Agriculture
Organization of the
United Nations

FOREST PRODUCTS IN THE GLOBAL BIOECONOMY

Enabling substitution by wood-based products and contributing
to the Sustainable Development Goals

Source: FAO, 2022

5 new sectors for the bioeconomy

(excluding the energy use of biomass)

- Engineered wood products

Cross-Laminated Timber (CLT or X-LAM): +37% annual growth (2014-20), NLT, glulam, CLT, MPP, LVL, ...

NEW EUROPEAN BAUHAUS

beautiful | sustainable | together

5 new sectors for the bioeconomy

(excluding the energy use of biomass)

- Engineered wood products

Cross-Laminated Timber (CLT or X-LAM): +37% annual growth (2014-20),
NLT, glulam, CLT, MPP, LVL, ...

- **RCF** (Recycled Cellulose Fibers) or **MMCF** (ManMade Cellulose Fibres);
biotextiles: viscose, Lyocell, Tence, Modal, ...

- Panels, foams and insulants

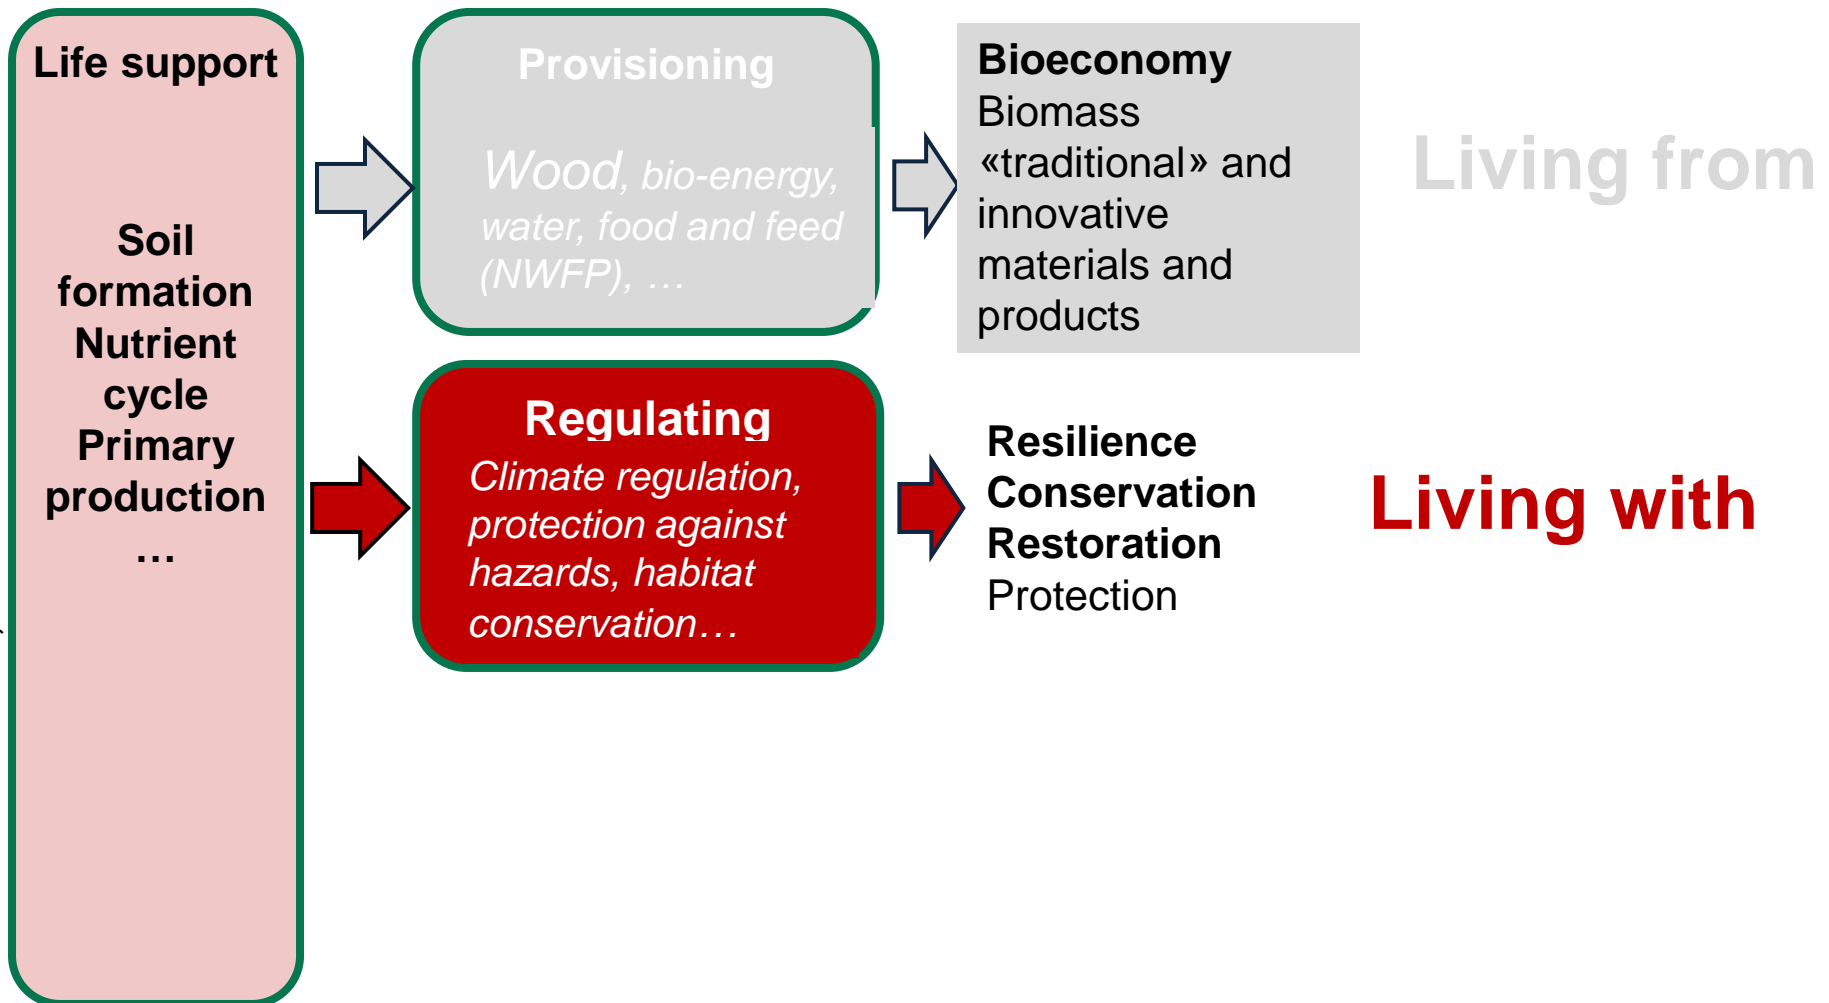

- Bio-plastics and PWC (Plastic-Wood Composite)

- Packaging (see new regulations forbidding single use plastic containers in EU by 2030)

Ecosystem Services (ES) and Life Frames

Source: MEA, 2005

New markets for the regulating services

- Market based mechanisms
 - Payments for environmental services
 - Standards, labels and certification schemes
 - SFN, LCA, traceability, social aspects, ...
 - Credits generation

Standards map (International Trade Centre www.standardsmap.com)

The screenshot displays the 'Standards Map App' interface. At the top, there is a navigation bar with icons for 'Identify', 'Compare', 'Trends', and 'Registry', along with a star icon and a language dropdown set to 'English'. Below this is a dark header with the word 'Identify' in white. The main content area has a light background with a green leaf pattern at the top. A message reads: 'Find the right standards for you by mixing and matching filters.' On the left, there are two filter panels. The 'Search by' panel has a search input field with the placeholder 'Type to search...'. The 'Filter by' panel is titled 'Sustainability' and has a 'Theme' button selected, with 'Pillar' as an alternative. Below these are dropdown menus for 'Human and labour rights' and 'Due Dilligence'. In the center, a red-bordered box highlights the text 'Showing 336 of 336 standards'. To the right of this box is a 'sort by' dropdown menu set to 'Alphabetical order'. Below the search area, two standard entries are visible. The first is 'A.I.S.E.' with a green circular logo and a 'See more' link. The second is 'ABNT Ecolabel' with a blue circular logo and a 'See more' link. Each entry has 'Profile' and 'Compare' buttons, and a star icon on a green background to its right.

Carbon credits typologies

Source: Ecosystem Marketplace, 2022

Not only carbon, but also biodiversity, peatland, water, bio-climate, sustainability, ... standards

UK Government Endorsed Standards

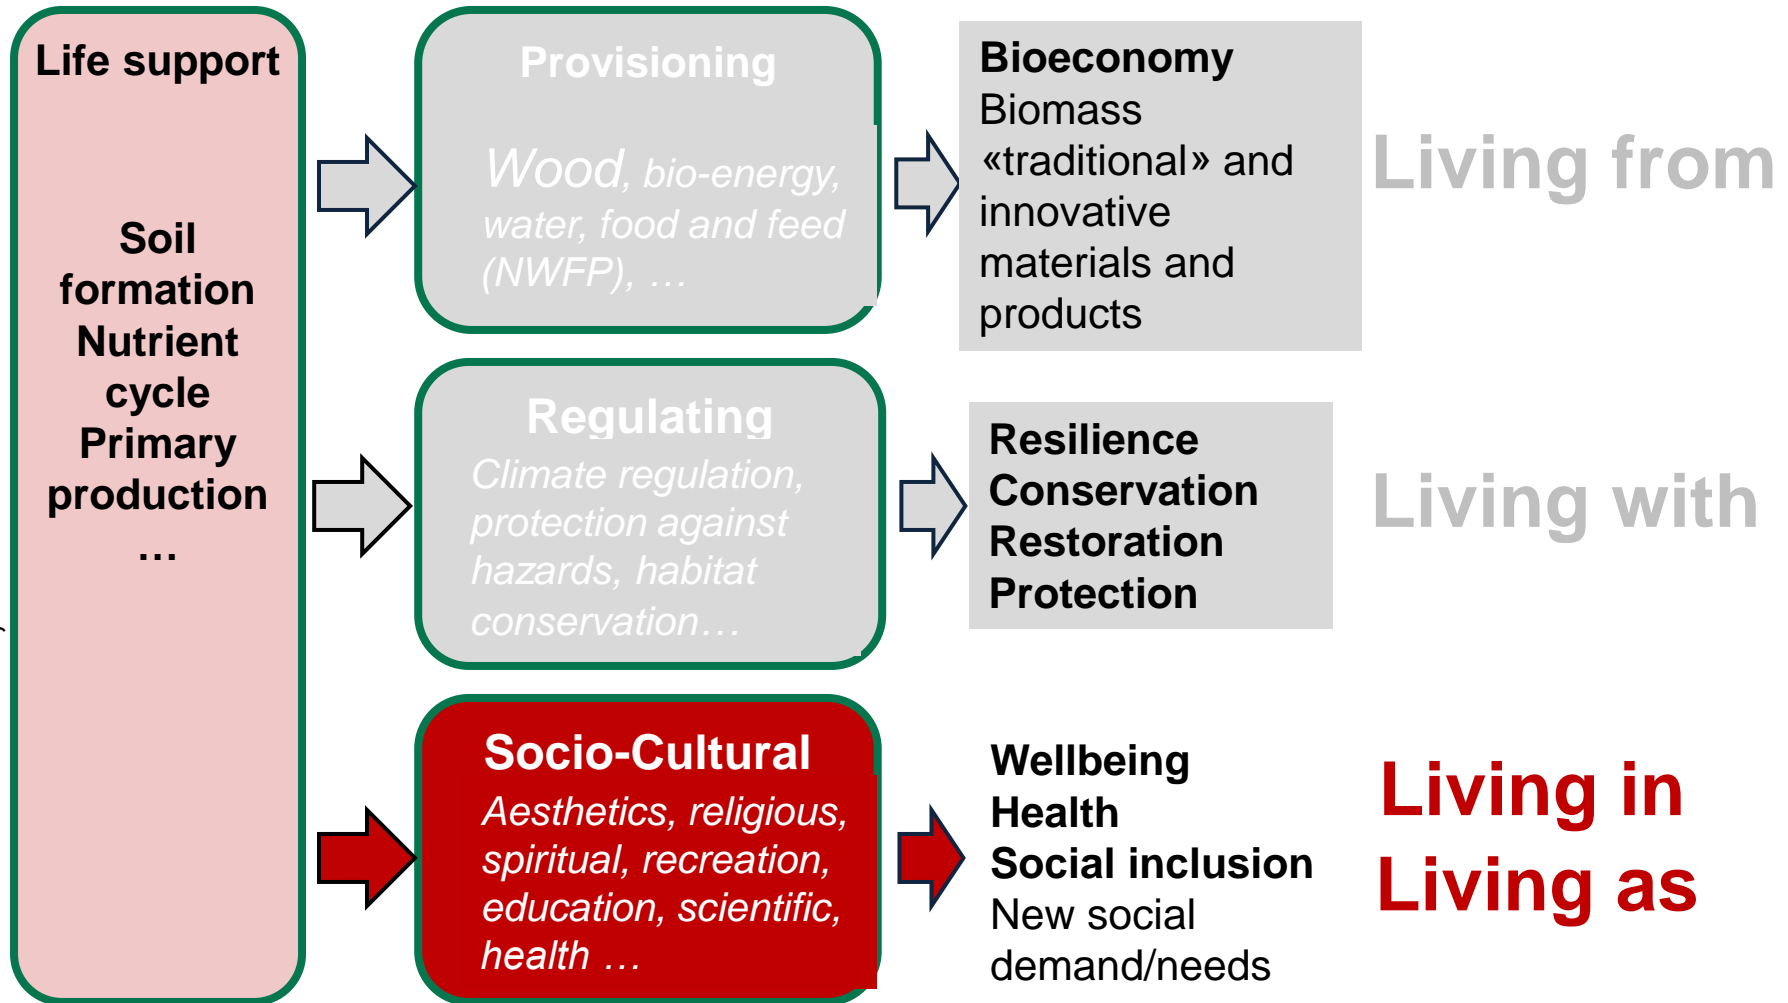

(as at 05.09.23)

Ecosystem Service Market	UK Government Endorsed	Relevant Metric
Woodland carbon	Woodland Carbon Code*	WCC Carbon Calculator
Peatland carbon	IUCN Peatland Code**	PC Emissions Calculator
Biodiversity net gain	To be confirmed***	Biodiversity Metric (v4.0)

Ecosystem Services (ES) and Life Frames

Source: MEA, 2005

(Socio-) Cultural services

Cultural services
(land art, concerts, performances...)

Recreation and tourism

Sport
(hiking, nordic walking, mountain bike, orienteering, ...)

Education

Spiritual and religious services
(luoghi di meditazione e culto, sepoltura in foresta, ...)

Social inclusion

Green care

Well-being and therapy
(forest bathing-Shinrin-Yoku, forest therapy,...)

At least 3 sources of undervaluation of socio-cultural services

- Some components are **not assessed**
- In advanced economies wild forest products **picking** is considered a provisioning service, while it is **a socio-cultural one**
- The real economic **impact** is often **down-stream** the socio-cultural services supply

Impacts of socio-cultural services development

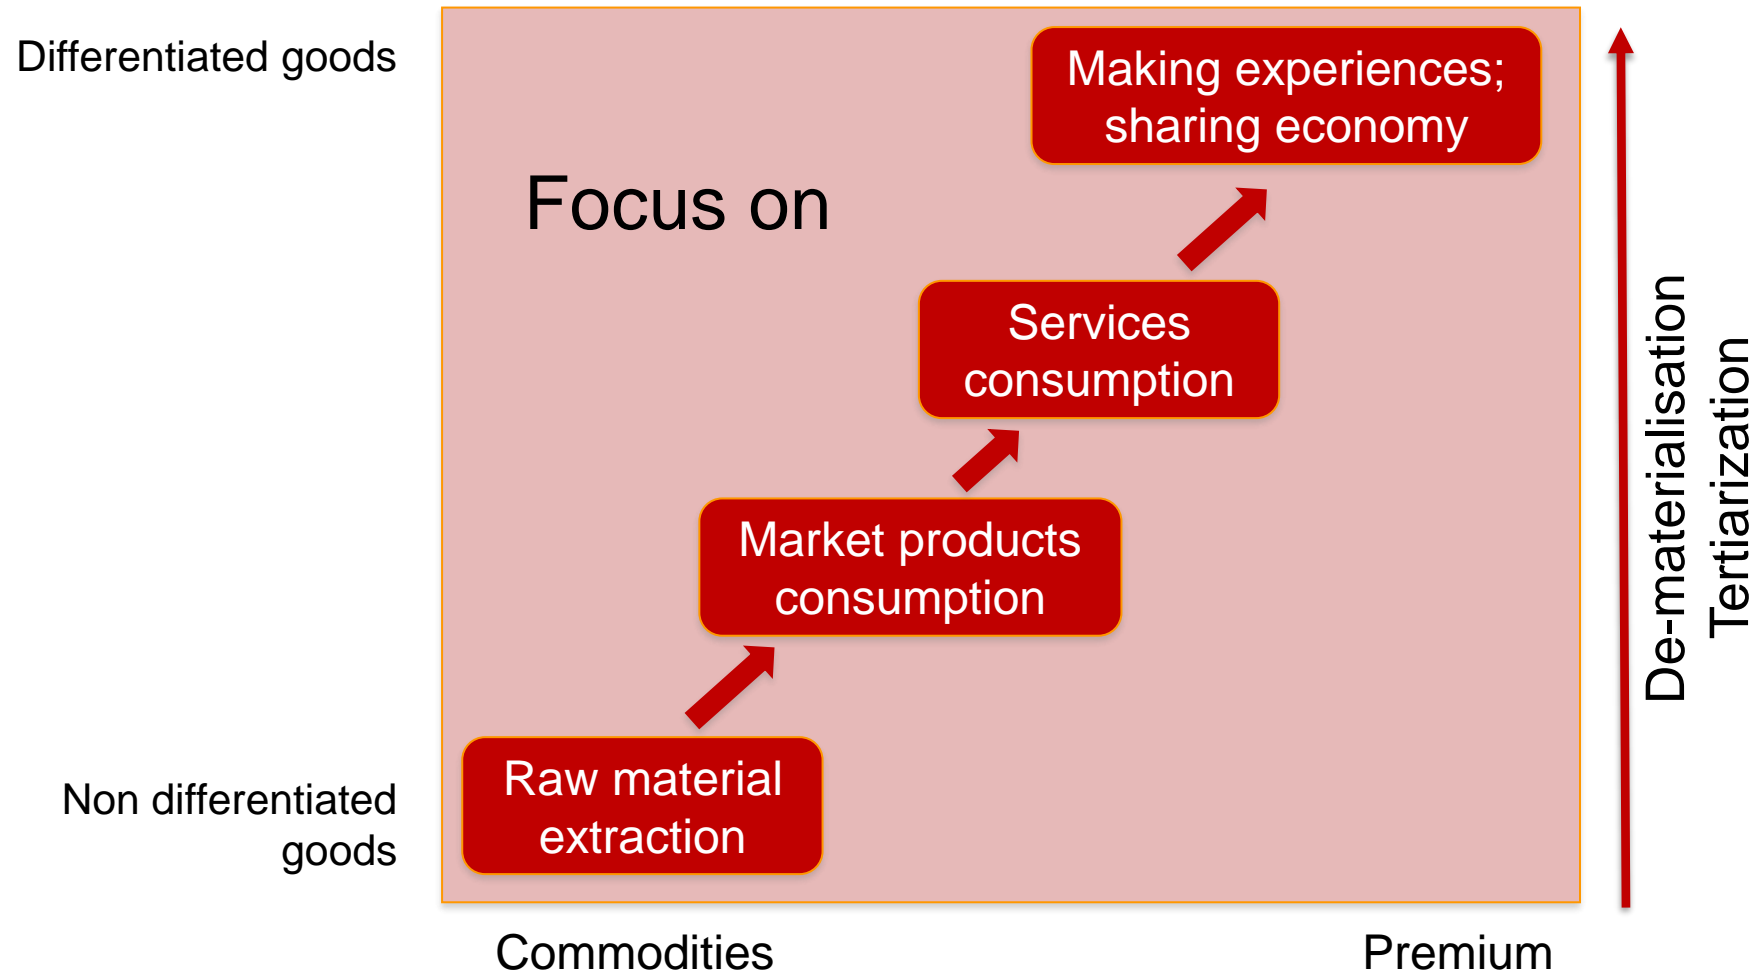

The new activities:

- they meet the needs of emerging citizens that the welfare state is often unable to satisfy
- they are linked to new expertise (→ new job opportunities)
- they are able to activate new financial sources (SRI)

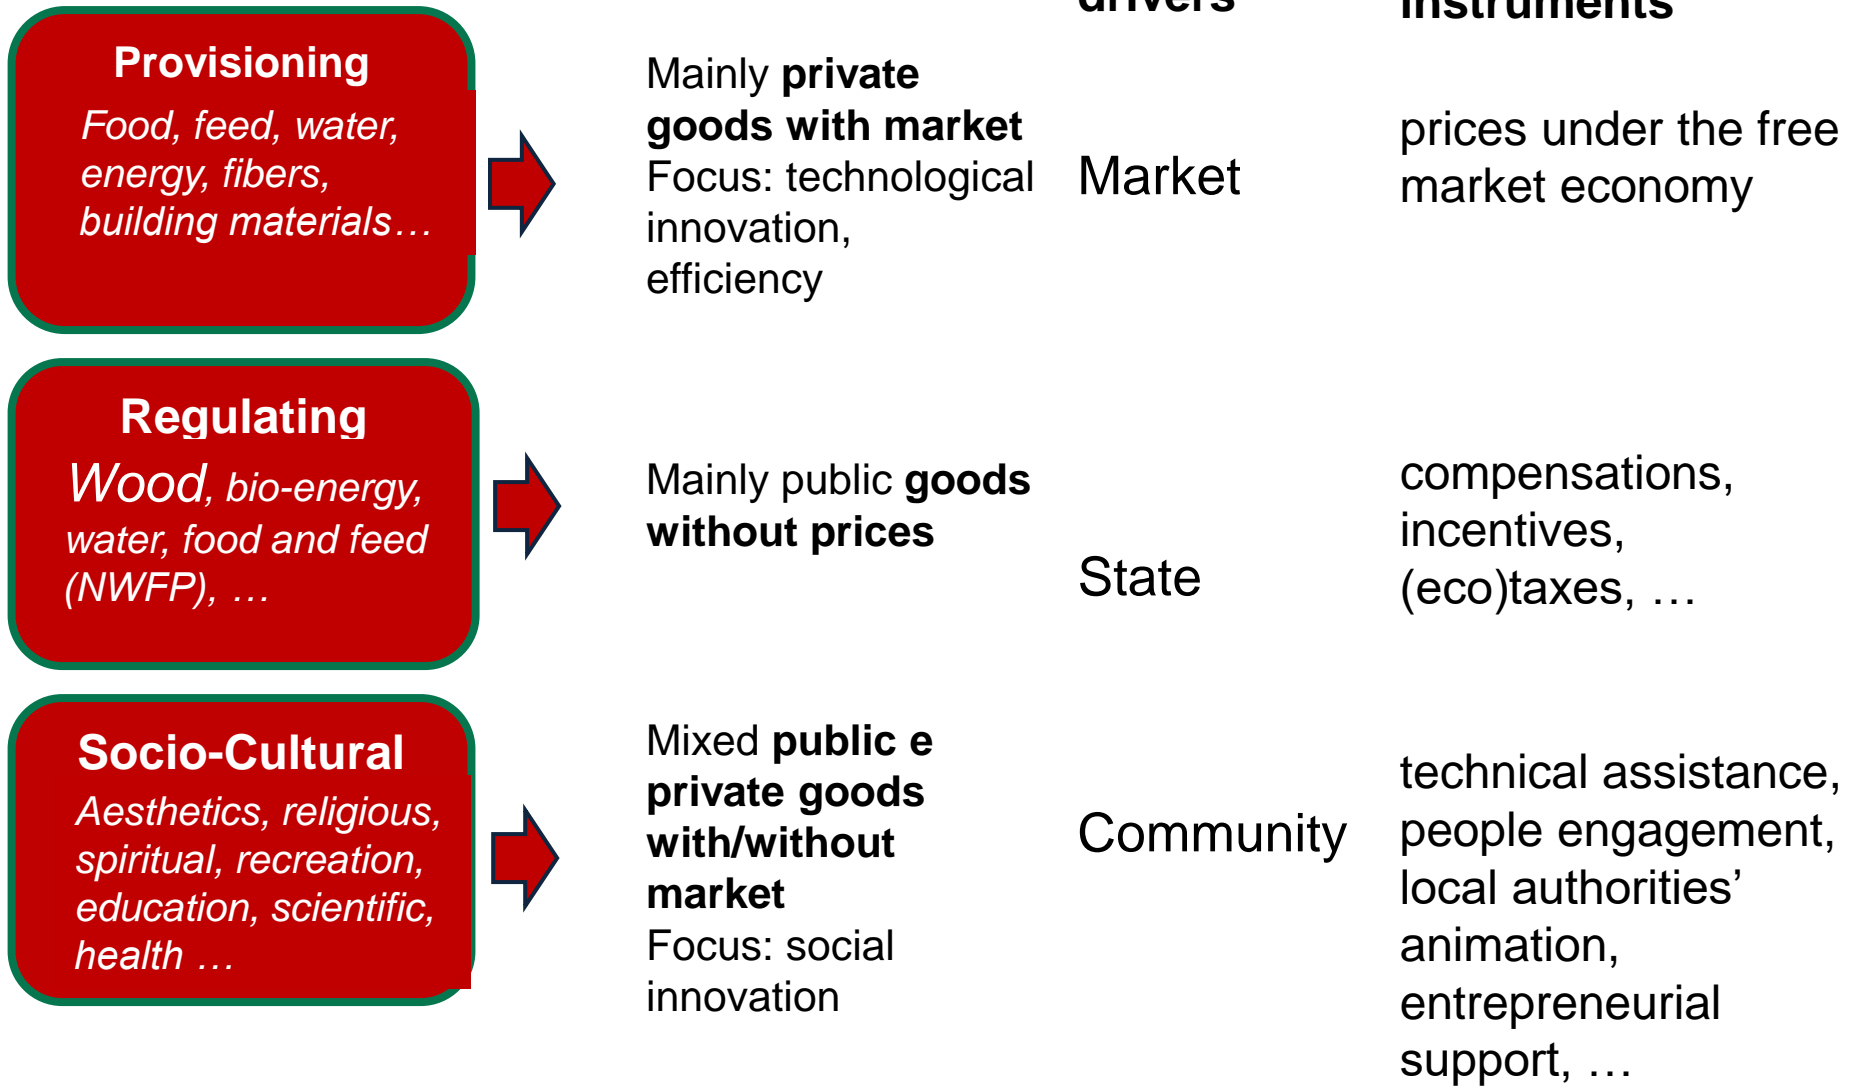

For implementing these activities, the private (social) sector is far ahead of the traditional forestry sector, their leaders and their way of thinking and deciding on the use of forest resources

SRI: Social Responsible Investments

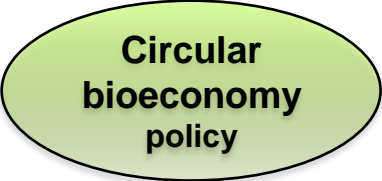

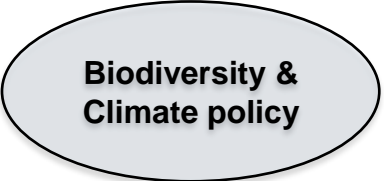

Growing role of Socio-cultural ES in line with the changes in economy

Source: B. Joseph Pine II e James H. Gilmore, 1998 (modif.)

A simplified view of ES and the role of the State

	Agents	Prevailing instruments	Some leading policies
Provisioning	Market (State)	prices under the free market economy	
Regulating	State (market)	compensations, incentives, (eco)taxes, ...	
Socio-Cultural	Community (State, market)	people engagement, technical assistance, local authorities' animation, entrepreneurial support, ...	

New initiatives to give value to forest-based ES: a lot of market failures

The Guardian

Revealed: more than 90% of rainforest carbon offsets by biggest certifier are worthless, analysis shows

Based on a new analysis at least 90% of Verra's rainforest carbon credits do not represent real emission reductions

Each credit is equal to one metric tonne of CO2 equivalent

94.9m
carbon credits
claimed

5.5m
real emissions
reductions

The investigation found that:

- Only a handful of Verra's rainforest projects showed evidence of deforestation reductions, according to two studies, with further analysis indicating that 94% of the credits had no benefit to the climate.
- The threat to forests had been overstated by about 400% on average for Verra projects, according to analysis of a 2022 University of Cambridge study.
- Gucci, Salesforce, BHP, [Shell](#), easyJet, Leon and the band Pearl Jam were among dozens of companies and organisations that have bought rainforest offsets approved by Verra for environmental claims.

<https://www.theguardian.com/environment/2023/jan/18/revealed-forest-carbon-offsets-biggest-provider-worthless-verra-aoe>

Public institutions define the **frame rules** (indicators, thresholds, procedures, institutional actors, M&V systems, ...) for managing environmental (forest) resources

An approach consistent with the principles of the “Nudges economics”

Innovative tools by civil society

Area of policy action	Private initiatives that have covered the areas of action
Supporting SFM	CoC standards by FSC, PEFC, Naturaland, Plockhugget, ...
Sustainable finance	GABV, FEBEA and INAISE networks' activities; Basel 1 and 2
Sustainable use of wood biomass	Better Biomass, ISCC, SBP, ... (see https://energy.ec.europa.eu/topics/renewable-energy/bioenergy/voluntary-schemes_en)
Sustainability reporting	GRI, CDP, SASB, ISO 14001 EMS, SASCB, Carbon Trust Standard, Greenhouse Gas Protocol by the WRI and WBCSD,...
Carbon credits generation	National Schemes and private certification schemes and standards
Legal origin of farm and forest products and their CoC	GFP, Rainforest Alliance, RTRS, RSB, RSPO, SAN, SBP + already mentioned forest related organizations

The later initiatives by the State

Area of policy action	Private initiatives that have covered the areas of action	The regulatory initiatives by the EU
Supporting SFM	CoC standards by FSC, PEFC, Naturaland, Plockhugget, ...	Closer to Nature Guidelines, Env. Claims and label Directive
Sustainable finance	GA ad	Sustainable finance package: ESG rating, Taxonomy
Sustainable use of wood biomass	Be htt en	REDII and REDIII
Sustainability reporting	G SA G an	CSRD (Corporate Sustainability Reporting Directive) and NFRD (Non-Financial Reporting Directive)
Carbon credits generation	Na cer	CRCF – Carbon Removal Certification Framework Regulation
Legal origin of farm and forest products and their CoC	GFP, Rainforest Alliance, RTRS, RSB, RSPO, SAN, SBP + already mentioned forest related organizations	EUTR – European Union Timber Regulation EUDR – European Union Deforestation and forest degradation Regulation

**The critical point:
the State is a
ruler or also a
new player?**

Opposite trends: need for finding compromise solutions

Urbanization
Rural desertification

Neo-ruralism
«Soft» economy, de-growth

Tertiarization
De-materialization

Bio-economy (bio-based tech. devlpmnt) and de-carbonization

Community-based forestry

Privatization and
State forests enterprises

Financial and market
globalization, global
supply chains

Nationalization, SRI and
Impact investments at
local level short value chain

Multi-functional forestry
Integrative forest mngmnt

Sustainable intensification
Segregative forest mngmnt

Diverse options with different trade-offs between ES
