

Curriculum Vitae

Pr Philippe Legrand

Décembre 2022

Etat civil :

Legrand Philippe
Né le 18 juin 1958

Académie d'Agriculture de France :

Élu membre correspondant en Décembre 2022
Section VIII, Alimentation Humaine

Situation actuelle et titre :

Professeur de Biochimie Nutrition Humaine à l'Institut Agro à Rennes, Laboratoire NuMeCan (Nutrition Métabolisme Cancer, Agro-INSERM)
65 rue de St Brieuc – 35042 Rennes cedex
Tél : 06 60 88 92 35, Tél-labo : 02 23 48 55 47
Adresse électronique : philippe.legrand@agrocampus-ouest.fr

Formation Diplomes :

- Ingénieur ENSIA et Diplôme d'Etudes Approfondies (DEA) en Sciences Alimentaires Université de Paris VI (1982)
- Doctorat d'Etat ès Sciences, Physiologie de la Nutrition, Université Paris VI (1987)

Carrière, fonctions exercées :

- Assistant de Biochimie à l'ENSA de Rennes (1982)
- Maître-Assistant à l'ENSA de Rennes (1987)
- Détachement à l'Université Cornell (USA) (1988-89)
- Maître de Conférences à l'ENSA de Rennes (1992)
- Professeur de Biochimie à l'ENSA de Rennes (1995)
- Directeur du laboratoire de Biochimie de l'ENSA de Rennes (1997- 2019)
- Directeur du laboratoire INRA associé (USC 2012, Dpt Alim-H) (1997-2019)

Domaines d'Expertise :

Biochimie, Nutrition Humaine, Physiologie, Lipidologie, Acides gras, Recommandations Nutritionnelles

Mots clés :

Nutrition, lipides, biochimie

Distinction et prix :

- Médaille Chevreul 2017

Fonction actuelle :

Professeur de Biochimie Nutrition Humaine à l’Institut Agro à Rennes, Laboratoire NuMeCan (Nutrition Métabolisme Cancer, Agro-INSERM)

Sélection de publications :

- 1 Durand G., Pascal G., Legrand P. et Gounelle De Pontanel H., 1985, Effets comparés d’huiles végétales et d’huiles de poisson sur la cholestérolémie du rat. Relations entre la composition en acides gras des lipides de la ration, celle des lipides sériques et la cholestérolémie. *Med. et Nutr.*, XXI, 391-406.
- 2 Legrand P. and Bensadoun A., 1991, Stearyl-coA desaturase activity in cultured rat hepatocytes. *Biochim. Biophys. Acta.*, 1086, 89-94.

- 11 Marchix J, Catheline D, Duby C, Boulier-Monthean N, Boissel F, Pedrono F and P Legrand (2020) Interactive effects of maternal and weaning high linoleic acid intake on hepatic lipid metabolism, oxylipins profile and hepatic steatosis in offspring. *J. Nutr. Biochem.* 75, 108241.

Short « Bio » :

PhD in Nutritional Biochemistry from University of Paris in 1987 and post-doc at Cornell University (USA) in the Division of Nutritional Sciences. He is Professor and chairman of the laboratory of Biochemistry and Human Nutrition in the Agronomic University of Rennes (Agrocampus). For more than 30 years, he performs research on fundamental aspects of fatty acid synthesis and metabolism. More precisely, he worked on the role of fatty acid desaturases showing the importance of stearic acid desaturase, showing that the conversion of poly-unsaturated n-6 and n-3 fatty acid shared the same desaturases, leading to the recommendations on the required n-6/n-3 balance in human diet. He works also since 15 years on saturated fatty acids, showing their nutritional interest and the necessary evolution to distinguish between short / middle chain / long chain saturated fatty acids. He is chairman since 1998 of the French guidelines committees for the fatty acid dietary recommendations, in the Food Safety Agency (ANSES) where he proposed a new approach for considering lipids in general, and more precisely saturated fatty acids. Author of more than 300 publications on Lipids, he recently received the CHEVREUL Medal award in Uppsala (Sweden) for his research production in the field of lipids in Nutrition. He is member of the International Society for the Study of fatty acids and Lipids (ISSFAL), member of the board of the French Nutrition Society SFN and worked several times as expert for European institutions.
