

Curriculum Vitae: Graeme Bruce Martin

Etat civil

MARTIN, Graeme

Né le 18 Décembre, 1951

Situation à l'Academie

Élu correspondant en 2019

Section III, Production animale

Groupe de travail: être décidé

Fonction exercée: être décidé

Titre: Professeur, Science animale

Coordonnées

Professionnelles: L'Université de Australie Occidentale

Adresse principale: Stirling Highway, Crawley, Western Australia 6009

Region de rattachement: Australie Occidentale

Numero portable: +61 408951052

Address email: Graeme.Martin@uwa.edu.au

Formations

1975: Diplômé en Sciences Agronomiques (Mention I) de l'Université de Western Australia

1981: Doctorat en endocrinologie de la reproduction ovine

Carrière

- | | |
|-----------|---|
| 1981-82 | Chercheur, Station de Physiologie de la Reproduction de l'INRA à Nouzilly) |
| 1983-1986 | Chercheur, l'Unité de Biologie de la Reproduction du Conseil de Recherches Médicales à Édimbourg (Royaume-Uni). |
| 1986-1994 | Chercheur (poste conjoint), à l'Université de WA et au CSIRO |
| 1994– | Professeur, agriculture, science animale, communication de science |
| 2001– | Professeur ('chair') |

Domaines d'Expertise

Reproduction animale

Endocrinologie

Systèmes de production animale

L'avenir de la nourriture

Communication de la science

Mots clés

Reproduction animale
Endocrinologie de reproduction
Neuroendocrinologie
Comportement sexuel
Nutrition et reproduction
Saisonnalité de la reproduction

Distinctions et prix éventuels

- 1991 Moir Medal, Australian Society for Animal Production
2009 Landcorp Lecture, New Zealand Society of Animal Production
2010 Listed in The Inaugural Australian Sheep and Lamb Industry Roll of Honour
2016 ‘Sex in 3 Cities’ – Invited public lecture series (Edinburgh, Nottingham, London; Society for Reproduction & Fertility) <http://srf-reproduction.org/events/sex-in-three-cities-events/>
2017 Science Council of Japan – Asian Association of Science Societies and Academies Workshop: Role of Science for Inclusive Society (Tokyo)
2017 Keynote speaker: European Association of Animal Production
2018 Invited speaker: Golden Jubilee Symposium; Society for Reproductive Biology (Adelaide)

Activités académiques ou professionnelles

Directeur des Sciences Animales de l'UWA

Doyen de la Faculté des Sciences Naturelles et Agricoles de l'UWA

Doyen de l'UWA Graduate Research School

Président du Conseil Académique (le comité académique de pointe de l'Université) de l'UWA

Directeur de l'Ecole de Biologie Animale de l'UWA

Directeur Adjoint de l'Institut d'Agriculture de l'UWA

Activités editoriales

Reproduction, Fertility & Development

Editeur-en-Chef (1 August 2015 –)

Membre, Joint Board of Standards, CSIRO-Australian Academy of Science (2015-2018)

Chair, Comité de Rédaction (2000-2006)

Membre, Joint Board of Standards, CSIRO-Australian Academy of Science (2000-2006)

Membre du Comité de Rédaction (1998-2000)

Reproduction (UK): Membre du Comité de Rédaction

Animal Reproduction Science: Membre du Comité de Rédaction

Domestic Animal Endocrinology: Membre du Comité de Rédaction

Reproduction in Domestic Animals: Membre du Comité de Rédaction

Short Bio (anglais)

Dr Martin's research covers basic and applied science, mostly on reproductive physiology in sheep, with a strong focus on how environmental factors influence the reproductive system, particularly the brain mechanisms that are involved. Graeme's long-term goal is to use this research to develop clean, green and ethical systems of animal production. From 1990 until 2014, he also led a project on ratites (emu, ostrich) and game birds, with a strong emphasis on reproductive biology and reproductive technology that was designed to support the development of new industries.

His laboratory uses the latest techniques in neuroscience, histology, endocrinology, metabolic physiology, behaviour, reproductive technology, and molecular biology, and computer modeling. He has collaborated with many institutions, locally, nationally and internationally, with international collaborators including: the Institut National de la Recherche Agronomique (France), the Roslin Institute (United Kingdom), the Royal Veterinary College (London), Universidad Nacional Autónoma de México, the Universidad de la República Oriental del Uruguay, The University of Yamaguchi (Japan), The University of Oxford, and The University of Bristol.

He currently leads *UWA Future Farm 2050* (www.ioa.uwa.edu.au/research/future-farm), a major multidisciplinary project that is transforming the University farm. The farm is not a traditional research station. Instead, it is a research project in its own right with its own vision: *imagine the best-practice farm for 2050, and start the transformation now*. The year 2050 was chosen because, by then, agriculture will have to help feed 50% more people without destroying the planet.
